February 1, 2024

**At the K2 Sale Facility,
Slater Road, Wheatland WY**

100 Head

**Bulls: 18-month-old and yearlings
registered yearling heifers**

Welcome! We always appreciate every one of you that takes the time to open this catalog. We also hope what you find interests you enough to join us online or in person.

We have been raising Red Angus cattle for over 20 years, but we both grew up on commercial cattle operations, and have been involved in the cattle business, literally, our whole lives. All these years have been used to create the herd that is the foundation for this sale. We raise range cows, not pampered cows. We raise cows that fit our environment. We raise cows that work out in the rough range... not just numbers on a paper. We believe this is important in a world where more and more cattle are selected sitting in front of a computer, and then fall apart as soon as they are expected to walk, breed, or work in the real world.

"What about carcass traits?" We sure don't slack on these. Again we use real world carcass cattle. Our family's business, Wyoming Pure Natural Beef, slaughters over 200 head for direct marketing each year, all

out of K2 Red Angus genetics. We get to see first hand how these cattle feed out. It also hits our bottom line for profit or loss. It is not just numbers on a page. It is not just something we sell you. It is how we make a living too.

Thank you for taking an interest in our cattle and our program. Feel free to come visit or give us a call anytime.

Sincerely,
Jason & Kim

In a time where we seem to be spending more and getting less—we are going to offer to give more, without it costing you more. Check out our expanded free delivery policy!

Copenhagen 3Y

Fertility Test

Bulls over 1 year old have all passed a complete Breeding Soundness exam and Fertility Test. Bulls under a year old are guaranteed to pass by 1 year of age.

Feeding

We will keep all bulls and feed them for free up to March 1st. At that time we will schedule deliveries. If you would like to take your bull sale day, you will receive \$200 credit per bull

Delivery— Bulls

Free Delivery to adjoining states (MT, SD, NE, CO, UT, ID).

Free Delivery to any central location in your state on total purchases of \$10,000 or more—including heifers!

If you want to buy the bulls—we will get them to you!

Heifers

Heifers are brucellosis vaccinated, and tested BVD negative.

Heifers can be picked up sale day, or any time up to February 15th.

Heifers transportation is the buyers responsibility unless they meet one of the following criteria:

- 1) If you have \$10,000 or over in total purchases your heifers will be delivered free of charge.
- 2) With bull purchase and delivery we will also feed and care for your heifers until that delivery date, and deliver the heifers along with your bulls.

Wheatland, Wyoming 82201

Sale Schedule

Thursday, February 1st

Hot Coffee, Cocoa and Donuts!

**10 a.m. — Cattle will be penned by the
sale facility and ready for viewing**

Noon — Complimentary Lunch

1 p.m. (MST) — Sale Starts

18-Month Old Bulls: Lots 1-51
Yearling Bulls: Lots 52-88
Registered Yearling Heifers: Lots 89-97

Videos are available for each lot at Dvauction.com
or a link on our website, k2redangus.com.

DV Auction: Bidding is available through DV
Auction. We recommend registering with DV at
least 24 hours ahead of sale time.

Phone Bids: If you would like to place bids with
a representative or bid over the phone feel free
to contact us, or any of the other sale contact
numbers. We can get you set up with someone to
help you.

Sale Order: Sale cattle are listed in lot order, and
will sell in lot order.

Location: All the sale cattle will be located at
our place off Slater Road; 2 S. Goertz Road,
Wheatland, WY (see map in back of catalog)
through sale time. Feel free to come by anytime
and look at the cattle. If you want to go see the
cow herd we can also do that.

PAP scores: All cattle in this sale are PAP
(pulmonary arterial pressure) tested. This is done
by Dr. Tim Holt. The scores are listed on each lot
at the lower right of the pedigree.

Bulls are Guaranteed

All bulls will be fertility tested and guaranteed sound breeders. Young bulls are guaranteed to have passed a fertility test by 1 year old.

All bulls are guaranteed to your satisfaction—if you bid online or phone, sight-unseen, we will make sure the bulls you purchase are the bulls you want.

All bulls will be guaranteed tested;

- BVD negative
- All 18-month-old bulls Trich negative

Replacement Guarantee Details:

- For Replacement Guarantee bulls must be in adequate condition to breed cows.
- We do not provide delivery or pick up for replacements bulls.
- You can choose a replacement bull, or credit for the next year's sale based on your bull's purchase price.

18 month-old-bulls on summer pasture

2024 Breeding season— More than a Guarantee

... because credit can't breed cows right now!

Bulls will be bulls, and unforeseen things will happen. They fight, break legs, break other things...including each other.

While we guarantee when you receive your bull he will have passed a complete fertility test, be sound and of the quality you purchased, all of that can't overcome everything a bull can do during the breeding season. We want to guarantee you will have a bull throughout your entire breeding season!

If a bull you purchased in our Winter 2024 sale, is unable to breed throughout your entire 2024 breeding season, we give you the option of getting another bull to finish out the season. (see details on page 3)

*We appreciate you being our
customer!*

K2 Union 704 1111 as a calf—Union is the sire of several of our yearling bulls.

704 cow is also the dam of Lot 89.

PAP Risk Category Flow Chart

Timothy N. Holt, DVM

2019

Location of PAP Test
Wheatland, Wyoming Ranch
K-2 Red Angus
Elevation 5523 feet

What do our scores mean? We have been breeding with PAP as a criteria since our herd started. Genetics for low PAP are consistent and deep in our herd. We guarantee your purchases to re-test at your elevation.

PAP Risk Factor High Elevation Test Chart

PAP test conducted at elevation 5500-7000 ft.
 (75-95% Repeatable, Predictive Value)

PAP Score	Use at Low Elev. (<4000 feet)	Use at Moderate Elev. (4000-5500 FEET)	Use at High Elev. (5500-7500 feet)	Use at Extreme (>7500 feet)
34-41	Low Risk	Low Risk	Low Risk	Low Risk
42-44	Low Risk	Low Risk	Low Risk	Moderate Risk
45-49	Moderate Risk	Moderate Risk	Moderate Risk	High Risk
>50	Moderate Risk	Moderate Risk	High Risk	High Risk

Calving Ease Scores

We have updated our Calving Ease Scores this year to a scale of 1-5 to better describe each bull. These scores are located in each bull's information at the bottom of the pedigree and just above the EPDs.

Our scores for each bull range from 1 – 5. 1 being recommended for only cows, to 5 being elite calving ease. We feel that sometimes the numbers can be hard to equate to what you can expect when the due date is here. To come up with our scores we do take into account the CED and BW EPD's, but we go a few steps farther. We look at our cows that we know well, and study her pedigree 3 generations back looking at calving and birth weight tendencies. We also look at how the sire has worked in our herd. We look at trends and variations on each side of the pedigree. It takes consistent calving ease on both sides of the pedigree to get our 4 or 5 status. We are very conservative on the calving ease since we calve all of our cows on the range without assistance. I believe our 3 scores are bulls that some people would use on heifers, and some people only on cows, depending on your calving situation and your cattle.

Please feel free to contact us if you have any questions or would like more information on this system of rating our bulls.

LASO Bucket List

Lots 1-88 Bulls

Bulls will sell in lot order.

We reserve the right to keep 1/2 semen interest in any sale bulls. Semen will be collected at our expense and the buyers convenience. The buyer has full possession of the bull.

These bulls are all registered and can be part of the Red Angus Feeder Calf Certification Program (FCCP).

We will be glad to help buyers learn about this program or enroll their calves.

Spring and Summer Calving programs

Our entire cattle operation is divided into a spring calving herd and a summer calving herd. There are several reasons why we operate this way;

- To spread out our labor—we can work twice as many cattle by splitting the timing of our labor.
- To match our pasture resources. Some pastures are better matched for cattle to be up in the mountains and inaccessible in the summer months. We like to have those calved out, branded, and rebred AI before the end of May.

The summer calving herd spends those winter and spring months fending for themselves with very little labor.

After the spring calving herd is turned up to summer pasture, we start calving the summer herd. This group is then branded, and rebred AI & ET and turned out to summer range about the time we start weaning and preg checking the spring group.

- To lower our bull needs. We use AI or Embryo Transfer on all of our females. We also expect our herd sires to breed in both seasons—requiring a true test of fertility, structure and fleshing ability.

Common Misconceptions

'The two calving seasons are for keeping open cows in the herd.' NO We absolutely do not use the two calving seasons to keep low fertility cattle. No open female is ever moved to the other calving season.

'Bulls that are sold as 18-month-olds are bulls that failed to sell the past year.' NO We only offer our bulls for sale once—"no sales" are never passed on to the next sale.

Ratios—and why we use them

In the footnotes you will see we put a lot of credit on ratios; especially birth and weaning ratios.

Ratios compare the calves in the same management group or environment. A Ratio of 100 is average for the group. For example a birth ratio of 95 indicates a lower than average birth weight. A weaning ratio of 105 or 110, show a calf that weaned well above the other calves raised the same way.

- » One reason we like to look at ratios is because we have multiple calving seasons. The ratios are a much better way to compare calves raised in different calving seasons and different environments than looking at weights.
- » We do not want to increase our cow size. Growth EPD averages keep increasing and so does mature cow size. We do not necessarily want to have a weaning weight EPD in the top 5% of the breed, but a ratio of 105 shows that for our cow size that calf weaned well above average. We don't want to ride the 'Roller coaster' of chasing EPDs.

YCYA Hector H60—A new herdsire for us that has worked very well and is a complete out-cross to many bloodlines in the breed.

- » The flip side! Ratios are also used in calculating EPDs. In theory an extreme ratio of 125 on weaning would seem good, and that is a way some “good” numbers are ‘built’. But, the way we see it we do not want cows on the lower side that are poor enough to make the top cow ratio 125. If the bottom half of the herd is made up of poor cattle, it makes the top half look extremely good from a numbers perspective. Our theory on this is that we want a good, solid, consistent herd of cows with each one pulling her weight and doing her work. We don't expect to have wild or extreme ratios because we hope our herd is too consistant for those extremes.

First calf heifer—with her daughter sired by Redman 8031. There are many bulls in the sale out of 8031.

K2 Reign daughter—Reign has several sons in this sale.

K2 Redman 631 8031

It is hard to get ratios better than this bull's. Light birth shooting up to a 114 weaning ratio. Great for heifers and cows.

This could be the hidden gem of the sale. An ET calf out of out great 113 cow and Hamilton - the best female making sire we have ever used. We have 2 straws of Hamilton left, and 113 is still producing great at 12. She still has a perfect udder and great feet. See the cow - love the bull!
